

National Severe Weather Warning Service

Chief Forecasters Assessment

A frontal system will affect Tayside, Angus, Dundee and Aberdeenshire for much of Friday before moving away into the North Sea by the end of the day. Cumulative rainfall totals are likely to reach 20 to 40 mm at low levels, with 60 mm expected over the high ground. The rain will fall onto already saturated ground increasing the risk of flooding.

The Met Office have issued a **Yellow Warning of Rain**

Valid from **09:00 on Fri, 14th Nov 2014** until **23:45 on Fri, 14th Nov 2014**

A band of persistent and at times heavy rain is expected to affect Tayside, Dundee, Angus and Aberdeenshire through Friday, before moving offshore later. This rain will fall onto already saturated ground increasing the risk of localised flooding.

This Warning has been updated to curtail the period of heaviest rainfall, as the frontal system is now expected to move offshore by the end of Friday, with rainfall subsequently dying out.
